

# Customer Persona

## Step 1: Buyer's Persona

**Persona Name:** *Aarav Shah – “The Fitness-Focused Foodie”*

| Element             | Description                                                                                                                        |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Demographics        | Male, 22–35 years old, Urban (Mumbai, Bangalore, Delhi), Middle to Upper-middle class, Monthly income ₹30K–₹1L                     |
| Occupation          | Working professional (corporate, tech, or creative) or fitness coach/student                                                       |
| Education           | Graduate or Postgraduate                                                                                                           |
| Lifestyle           | Fitness enthusiast, tracks calories, prefers healthy snacking options, follows gym or home workouts, values convenience and taste  |
| Interests           | Fitness, Nutrition, YouTube fitness influencers, outdoor sports, meal prepping, healthy food brands                                |
| Buying Motivation   | Wants snacks that are high-protein, low-sugar, and 100% natural; believes in transparent ingredient labeling (“no added nonsense”) |
| Buying Concerns     | Finds protein bars expensive, worries about artificial sweeteners, limited availability in local stores                            |
| Goals               | Maintain fitness routine, stay energized during workdays, build muscle while eating clean                                          |
| Pain Points         | Lack of tasty yet healthy snacks, confusion over nutritional value, and skepticism about “fake healthy” brands                     |
| Values              | Honesty in ingredients, sustainable packaging, and convenience                                                                     |
| Preferred Platforms | Instagram Reels, YouTube, and Fitness apps                                                                                         |
| Buying Behaviour    | Shops online (Amazon, brand website), sometimes buys from gyms or health stores                                                    |

|                        |                                                                              |
|------------------------|------------------------------------------------------------------------------|
| Decision Maker at Home | Self or shared with partner                                                  |
| Spending Power         | Moderate (₹100–₹150 per snack/protein bar)                                   |
| Preferred Content Type | Short fitness videos, influencer product reviews, quick healthy recipe reels |

## Secondary Personas

- Riya Patel – The Conscious Student (Age 18–25):**  
College student who wants guilt-free snacking options; follows Instagram fitness creators; prefers affordable, healthy snacks.
- Karan Mehta – The Busy Professional (Age 25–40):**  
Office-goer who skips meals; prefers portable, healthy snacks that keep him full during long work hours.

## Step 2: Budget Allocation (₹10 Lakhs Total)

Duration: 3 Months

| Phase        | Objective                                            | Duration   | % Budget | Amount (₹) |
|--------------|------------------------------------------------------|------------|----------|------------|
| Awareness    | Increase brand reach, introduce protein bar benefits | 1 month    | 40%      | ₹4,00,000  |
| Engagement   | Drive social media interaction & website traffic     | 1 month    | 30%      | ₹3,00,000  |
| Conversion   | Retarget interested users & boost sales              | 1 month    | 20%      | ₹2,00,000  |
| Optimization | Testing, influencer trials, contingencies            | Continuous | 10%      | ₹1,00,000  |

## Step 3: Campaign Structure

### A) Objective:

- Create awareness about “honest ingredients, no added sugar.”
- Build trust with fitness & health-conscious consumers.
- Convert awareness into trial purchases.

### B) Targeting:

- **Demographics:** Male/Female 18–40 years, metro cities, health-conscious consumers
- **Interests:** Gym, fitness, healthy lifestyle, protein snacks, nutrition, vegan products
- **Behavior:** Online shoppers, follow fitness influencers, purchase health supplements

### C) Placements:

- **Instagram & YouTube:** Reels, Shorts, influencer reviews
- **Google Ads:** Search keywords like “best protein bar in India,” “healthy snacks,” etc.
- **Amazon Ads:** Product search targeting
- **Email:** Fitness challenge newsletters, product offers

### D) Ad Formats:

- Influencer reels (gym + lifestyle)
- UGC videos: “Snack with honesty” stories
- Carousel ads showcasing bar flavors & ingredients
- YouTube short ads (15 sec “No sugar, just truth”)

## Step 4: Metrics to Track (KPIs)

| Category      | Metric                                 | Purpose                    |
|---------------|----------------------------------------|----------------------------|
| Awareness     | Reach, Impressions, CPM                | Measure visibility         |
| Engagement    | Likes, Shares, CTR, Saves, Video Views | Gauge interest             |
| Consideration | Website traffic, Add-to-cart           | Evaluate engagement        |
| Conversion    | Sales, CPA, ROAS                       | Track revenue & efficiency |
| Retention     | Repeat buyers, email open rate         | Measure loyalty            |

## Summary

| Aspect     | Key Takeaway                                        |
|------------|-----------------------------------------------------|
| Persona    | Urban health-conscious youth & professionals        |
| Motivation | Honest ingredients, taste + nutrition               |
| Budget     | ₹10L across 3 months, focus on digital + influencer |
| Platforms  | Instagram, YouTube, Google Search                   |
| Goal       | Awareness → Engagement → Trial → Retention          |
